

Dear Day Families:

The plans for the STEM Fair are underway! Everything you need to know can be found in this [brochure](#) including some tips for coming up with good ideas for science experiments and engineering design projects. It also includes information about the STEM Fair Clubs.

The date of the Day School STEM Fair is:
February 13, 2018
6:00 – 7:30 in the Day School Gymnasium.

There are two direction sheets:

[Scientific Method Direction Sheet](#)
[Engineering Design Direction Sheet](#)

Students will bring their projects to school on February 13th and present them to their classes. Teachers will provide specific, positive feedback after the presentation.

Please note: this is not a competitive fair. Students are encouraged to participate for the opportunity to experience STEM first-hand and share their innovative ideas with their peers. Research shows that students make up their minds about the possibility of pursuing a career in STEM fields by the time they leave fifth grade, so this foundation is important!

To register for the fair, please complete this [Entry Form](#) with your child. **The deadline for registration is December 22, 2017.**

To display some of the "behind the scenes" work that takes place with a project, please take a few photos of your child in action and email them to me at esantelmann@westfordk12.us to be included in a slide show at the fair. Please include "Day School" in the subject line.

Thank you for encouraging your child to participate in the fair!

Best regards,

Elaine Santelmann, M.S., M.Ed.
